UX Feedback Report

Date	:	6/19/2023
Version	:	1
State	:	Released
Author	:	Aya Shikh Suliman

Table of contents:

1.   Feedback 1:

I asked for this feedback in the beginning of the process of my making my UI/UX. Here are the results:

Page	Feedback	Improved?
Home page	Very attractive home page	No need
Courses page	Put them next to each other than under each other	Yes
Lessons page	I cannot see lessons yet	Lessons page wasn't really implemented yet. Now there are lessons
Login/sign up page	The design is a bit ugly, and it doesn't match the theme of the project	Yes
Lessons management page	Put the table on the whole page. Otherwise, it feels a bit empty	Yes
Courses management page	Same thing as lessons page	Yes

2.   Feedback 2:

After feedback 1, I improved what the user suggested and then I asked for feedback again from another user:

Page	Feedback	Improved?
Home page	Very clear photo	No need
Courses page	Nice page. Maybe put the navbar items on the same line	Not yet
Lessons page	Its very clear, but maybe fill it up with more info	Not yet
Login/sign up page	Very nice UI, but maybe when I press on get started, navigate me immediately to the sign-up section. So that I do not have to press on the sign-up button again!	Not yet
Lessons management page	Normal. Maybe add some input validation	Not yet
Courses management page	Input validation would also be nice here
